

FAT GECKO

BIKE CAMERA MOUNT

Overview

The Fat Gecko camera mount for bikes makes it possible to securely attach any camera or camcorder to the center handlebars of a bicycle to capture unbelievable action footage. The removable mount utilizes the existing handlebar bolts and an adjustable height extender that straps directly to the bike stem to achieve an array of angles using a DSLR, compact camera, or video camera.

Once the mount is installed, the camera can be removed and re-attached independently using a built in quick-release feature. Rugged materials and construction ensure that the mount holds up through an array of on and off-road adventures without adding any extra bulk or weight. Tested and recommended for an assortment of bikes including: road, mountain, hybrid, touring, racing, cruisers, trick and more.
