

# FAT GECKO™

## MINI CAMERA MOUNT

### Overview

The Fat Gecko Mini mount is a powerful locking suction cup mount that makes unique video and photography capture possible from almost any smooth surface; surfboards, motorcycles, wakeboards, ATVs, helmets, windows and more. Like the Fat Gecko camera mount, the Fat Gecko Mini uses the unbelievable strength of locking suction and a universal mounting screw to securely attach any standard camera or camcorder to the vehicle or object of your choice.

The Fat Gecko Mini is ideal in situations where size and weight are critical, especially in extreme sports where a compact camera is preferred and dual suction isn't necessary. With an adjustable joint and a 3" extension bar, it's easy to set up shots over a windshield, around an instrument panel, over a binding, or anywhere else that a standard tripod or camera mount wouldn't normally holdup - this is one extreme mount for extreme conditions.

### Features

- 3" height extender included
- Universal 1/4" tripod mount works with any camera
- Extendable height with 360° tilt, turn & rotation offers unlimited shooting possibilities
- Powerful locking suction attaches to any smooth, flat, non-porous surface
- Ruggedized construction holds up in extreme conditions
- Quickly move cameras from surface to surface

#### Intended Use:

Compact cameras, video cameras, and tripod heads weighing up to 4lbs.

### Specifications
