

FAT GECKO

ANTENNA TREE MOUNT

Overview

The Fat Gecko Aviation Antenna Tree Mount gives users a quick and easy way to mount GPS antennas and others out of the way. The Antenna accessory in conjunction with the Fat Gecko Mini uses one locking suction cup to attach to any smooth, flat, non porous surface including inside an airplane canopy, on boats, and other vehicles or surfaces. The Fat Gecko Mini is originally a camera mount, and this antenna accessory adds utility by simply replacing the standard photo ball with one designed to attach to the antenna plate, which is custom built to hold the XM™ and Garmin™ antennas. It can be quickly changed back to a camera mount by replacing the ball.

The design of the Fat Gecko Mini allows for easy attaching and detaching of the Antenna Tree to any smooth surface. In addition, there is an adjustable knuckle allowing for 360° tilt, turn & rotation for unlimited setup angles.

Specifications

Part Number	DDMOUNT-AC-ANT
UPC Code	750323669490
MAP	\$19.99
MSRP	\$24.99
Warranty	2 years
Weight	.310 lbs. (.141 kg.)
Dimensions	Length = 5.39 in. (136.9 mm), Width = 3.34 in. (84.8 mm), Height = 1.58 in. (40.1 mm)
Load Capacity	With Fat Gecko Mini Mount 4 pounds (1.81 kg.)
MasterPack	10pcs

Features

- Powerful locking suction attaches to any smooth, flat, non-porous surface
- Infinite location possibilities, to get the antennas and cables out of the way.
- Knuckle design provides 360° tilt, turn & rotation with unlimited setup possibilities
- Ruggedized construction holds up in any condition
