Increased Power for Extended Use

High Cell Quality for Longer Lifetime

Industry Leading Electronic Design and Circuitry

Protected by a 2 Year Limited Warranty

Have You Tried Delkin Power Yet?

Delkin Power rechargeable batteries are available for most digital cameras and camcorders, and are designed to be 100% compliant with the original equipment manufacturer's specifications. Since Delkin Power batteries are packed with even more power, you can trust that they will last longer over time and keep you shooting longer between charges.

Do we have a battery for your camera?

Chances are, the answer is yes! Delkin Power batteries are designed and manufactured as new camera and camcorder models are released, and then thoroughly tested for 100% model compatibility before being brought to market. Delkin Power battery models are generally available within two months of the camera or camcorder's introduction.

Replacement batteries are currently available for the following brands, with new models introduced monthly: Canon, Nikon, Sony, Kodak, Olympus, Fuji, Casio, Panasonic, Leica, Pentax, Konica Minolta, Samsung and JVC. For a full listing of available battery models go to www.delkin.com

Why use Delkin Power for your battery needs?

There are many reasons that Delkin Power rechargeable batteries are one of the most trusted replacement brands used in digital cameras today. Every battery lot is carefully inspected and tested for accurate voltage and mAh ratings, and then put through a series of inspections that include impact and temperature tests before moving on to be packaged and shipped. Since our batteries are manufactured as they are needed, you can be assured that your Delkin Power battery is fresh and can be relied upon for a long lifetime of use!

Our Commitment to be Earth-Friendly

Delkin Devices is an active participant in the Call 2 Recycle rechargeable battery program and is committed to keeping products earth-friendly. If you are unable to recycle your Delkin Power battery at the end of its lifetime, you may ship it back to our warehouse where we will happily recycle your battery free of charge.
