eFilm™ PRO

Professional Digital Memory Card

Lightning Fast Performance

"To say that I was impressed is putting it mildly ...especially with its speed & price!"

-Monte Zucker

Dean of Wedding/Portrait Photographers

Monte uses eFilm PRO Cards to achieve perfection.

"For my digital portraiture I rely on simple, easy posing and lighting and an eFilm Pro card in my camera to capture it quickly and efficiently. Exposure was for a main light 6' from the subject at a 45° angle to her face. A second main light 1/2 the power of the main was positioned low, parallel to the right side of her face, split-lighting her face. A fill light was behind the camera 2 f/stops less than the main. Camera height was at her waistline."

Higher Capacities – Faster Speed – Lifetime Warranty – Lower Price

Designed to be fast and durable for extensive shooting in the most extreme conditions with today's SLR digital cameras. Affordably priced for the PRO photographer with sustained write speeds up to and exceeding 3.6 MB/sec*.

All Delkin eFilm Digital Memory Cards are guaranteed with a lifetime warranty and are 100% compatible.
