eFilm[™] PRO

Professional Digital Memory Card
Lightning Fast Performance

"This is the fastest and most reliable digital camera card I have ever used!"

-Arthur Morris

World-renowned Bird Photographer

**Arthur uses
eFilm PRO cards to
achieve perfection.**

This preening Brown Pelican image was made with the Canon 1D digital camera body and the Canon 500mm f/4 L IS lens. When photographing natural history subjects carefully consider both the background and the placement of the subject in the frame. Here, a background of Pacific blue and a balanced composition yield a pleasing image.

"Visit your local independent photo store. More choices, better service, great prices."
